MEMORANDUM FOR THE RECORD

SUBJECT: IG on Nuclear Testing, 3 February 1982

The IG on Nuclear Testing met again on 3 February to discuss US policy on the possible establishment of a CD subgroup to discuss CTB and possibly other nuclear issues. ACDA and State/EUR favored a group with a broad mandate covering all nuclear issues, OSD favored a narrower mandate focussing predominantly on verification issues. JCS, NSC and DoE favored continued opposition to any form of subgroup. I repeated our concern about potential problems arising from any detailed discussion of verification issues in the CD. After the discussion, Acting Chairman Dean (State/PM) asked that the IGWG develop draft CD instructions for a "narrow" mandate to be discussed further by the IG.
